"But Mom, I don't  
wanna go to the vet!!!

Dear Sammy:

I understand. Vet visits are tough. Mom and Dad just don't seem to realize what's really involved like:

- The too-small pet carrier
- The sea-sickness inducing car ride
- Smelly exam rooms
- Needles
- Thermometers inserted in unmentionable places...

### Old fashioned house calls with a modern day twist

Well, while I can't get rid of the needles or the thermometers, I *can* make it a little easier. How about a checkup in the comfort of your own home, PLUS a 20% discount for Mom and Dad? You see, thanks to people like your parents, I've been taking care of animals in their homes for almost 20 years...I know how to make an unpleasant day, pleasant.

My spiffy mobile vet van provides you with:

- Annual exams
- Diagnostics
- Health maintenance (that's P.C. for 'shots') ☺
- Healthy food
- Tasty treats and vitamin supplements

My arthritis was so bad, I could hardly walk. Thanks to Dr. Mike's personal attention and glucosamine supplements, I'm now back to my old yoga tricks!

### Time with the pet... Time with the parents

Sammy, it's ALL ABOUT YOU. You'll get a thorough, 45 minute - 1 hour exam, complete with ear cleaning, nail clipping, teeth check, and maybe a trim around those difficult-to-reach areas.

Then, it's all about MOM AND DAD. We'll spend another 45 minutes to an hour talking about your general health and eating habits. By the way, my records show you topped out at 17 lbs last year...how's that diet coming along?

## Flexible scheduling options

Weekdays are busy for parents so I make my visits work for everyone:

- Monday - Friday: 9:00AM - 7:00PM
- Saturdays: 10:00AM - 6:00PM
- Sundays: 12:00 PM - 5:00 PM

And unlike the cable, electric, or furniture delivery guys, you don't wait for me. If your appointment is at 6:30 PM, I'm there at 6:30PM.

I used to be so ashamed of my halitosis but Dr. Mike fixed me right up with a new diet, clean teeth, and tasty afternoon snacks that keep my breath minty-fresh!!
